

## **Sliding Gate for Conveyors KD 04**

**Danish Wastewater  
Equipment**

# Sliding Gate for Conveyors Model KD 04

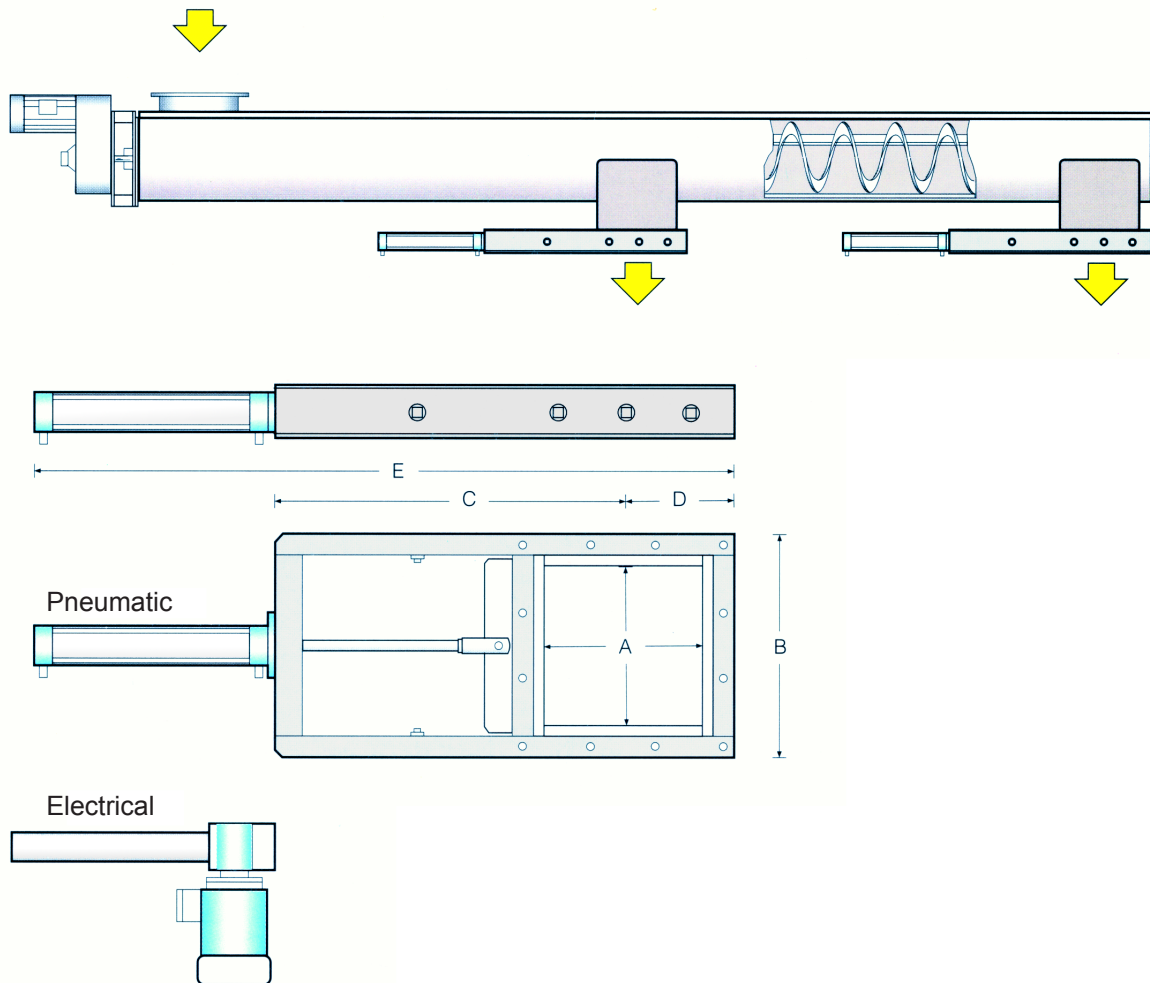

**Sliding Gate for Conveyors KD 04** is a simple and solid construction, resistant to all products that are used in purification units, such as sludge and water.

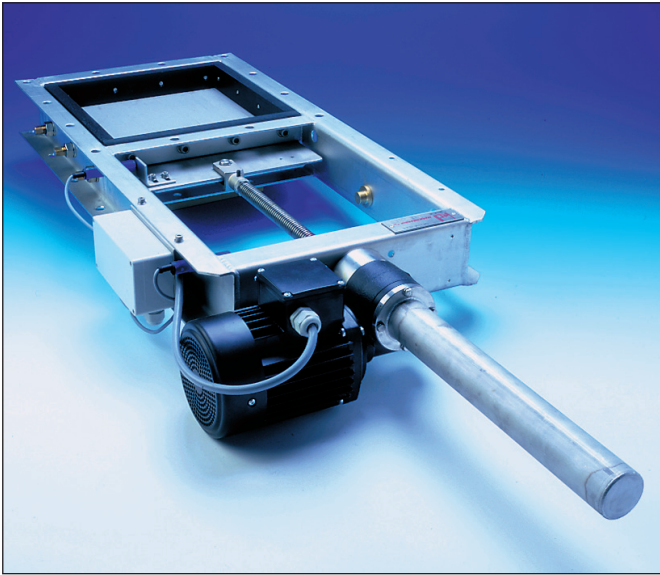

The gates are made of stainless steel and completely pickled. The operation can be manual, pneumatic or electrical.

Inductive sensors indicate whether the gate is open or closed.

The gates have been developed especially for shaftless worms, type KD 02 and can also be delivered in a manual version.

This kind of slide gate can also be adapted to the customer's wishes, in case another construction is required.
